Software Analysis and Design- N04

Instructor: M.Sc. Vu Quang Dung
Group 1 - EduPhenikaa

Members of Group 1:

- *St. Khoa Vu Dang - 22010357*
- *St. Tieu Cong Tuan - 22010491*
- *St. Trinh Van Toan - 22010175*
- *St. Nam Phan Vu Hoai - 22010066*

PROJECT OVERVIEW

❗ PROBLEM

For Learners:

- Complex interfaces that are difficult to use, especially for those not familiar with technology.
- Lack of flexibility in personalizing the learning journey.
- Difficulty in storing and verifying certificates after completing courses.

For Instructor:

- Content creation tools that are complex, non-intuitive, and time-consuming.
- Lack of features to manage and track learners' progress effectively.
- Difficulty in creating engaging lessons that integrate multimedia (videos, quizzes, assessments).

PROJECT OVERVIEW

GOAL

1. Enhance learning efficiency ✓
2. Increase access to education ✓
3. Create a flexible learning environment ✓
4. Obtain prestigious certificates and degrees ✓
5. Improve self-learning ability ✓

TECHNOLOGIES USED

FRONT-END:

1. HTML/CSS/JavaScript
2. ReactJS

BACK-END:

1. NodeJS
2. ExpressJS

DATABASE:

1. MongoDB
